

ABSTRACT

[58] The present invention provides a system and method for remotely accessing a private database using a wireless communication device. Briefly described, one embodiment comprises receiving a private database access request from the wireless communication device, the private database access request including at least an appliance identification (ID) that uniquely identifies the wireless communication device; comparing the appliance ID with a security indicia, the security indicia associated with the wireless communication device; and communicating the information from the private database to the wireless communication device when the appliance ID corresponds to the security indicia.
